

Department of Mathematics Visiting Assistant Professor Position Announcement

Applications are invited for three Visiting Assistant Professor positions, one in algebra and/or combinatorics, one in computational mathematics, and one in probability and/or statistics expected to begin on August 18, 2017. These are non-tenure track, limited term appointments for three consecutive academic years (272 days). Preference will be given to candidates whose research meshes well with current faculty interests in the designated areas. Ph.D. or ABD in math or a related field is expected by the start date of the appointment; commitment to excellence in teaching mathematics and commitment to excellence in research are expected.

For a complete announcement and to apply online go to <https://employment.ku.edu> and click "Search Openings" and search by "VAP". In addition at least four recommendation letters (teaching ability must be addressed in at least one letter) should be submitted to MathJobs.org at <https://www.mathjobs.org/jobs/jobs/9269> (for COMP MATH; 9270 for PROB STATS; 9271 for ALG COMB). Review of applications will begin December 1, 2016 and will continue as long as needed to identify a qualified pool. KU is an EO/AE, full policy <http://policy.ku.edu/IOA/nondiscrimination>.

The University of Kansas is a major public research and training university and is the only Kansas Regents university to hold membership in the prestigious Association of American Universities. KU offers the highest quality undergraduate, graduate, and professional programs, as well as outstanding libraries, museums and technology. The university fosters a multicultural environment in which the dignity and rights of individuals are respected.

The Department of Mathematics has an internationally recognized faculty and a strong graduate program leading to both the M.A. and Ph.D. degrees. A broad range of programs is possible including algebra, analysis, combinatorics, control theory, dynamical systems, algebraic and differential geometry, numerical analysis, probability, statistics, stochastic processes, partial differential equations, set theory, and topology. The department has a long tradition of excellence. The first Ph.D. granted west of the Mississippi was in mathematics at KU in the year 1895. Recent interdisciplinary work has involved projects in biology, computer science, economics, engineering, finance, geology, medicine, and physics.
