

Student Chapter Meeting

Monday, December 3, 2007

306 Snow Hall

3:00p.m- *“Interacting neuronal networks and the implications for epilepsy”*

Sarah Feldt, Ph.D student, University of Michigan

4:00p.m- *“My Work in Biostatistics at Mayo Clinic”*

Megan OByrne, Mayo Clinic, Division of Biostatistics

Sarah Feldt received undergraduate degrees in physics and mathematics from the University of Kansas in 2004. She then completed a masters in physics in 2005, and a complex systems certificate in 2007, both at the University of Michigan where she is currently a Ph.D. candidate in the physics department. Her current research focuses on the relationship between the structure and dynamics of neural systems, which she studies from both computational and experimental approaches.

Megan OByrne graduated from KU in 2002 with a BS and in 2004 with an MA in Mathematics. She has worked in the Division of Biostatistics, Department of Health Sciences Research, Mayo Clinic for the past 3.5 years. She supports clinical research in the areas of surgery, orthopedics, and critical care medicine. She has been married for 5 years to Jamie, they have a beautiful 11 month-old daughter named Alys.
