Math 661 GEOMETRY II

FINAL EXAM (Take-home)

May 5 (Thu), 2016

Due date: May 12 (Thu), 2016

Instructor: Yasuyuki Kachi

Line #: 66160.

ID #: Name:

This take-home part of Final Exam is worth 100 points and is due Thursday, May 13th, 2016. Submission after 4:00 pm, May 12th, will not be accepted.

- Be sure to write your answers neatly, precisely, and with complete sentences. You may use notes and handed out materials, but no outside help.

[I] (Take-home; 100pts) Summarize what you have learned in this class during this semester. Please give serious answers.

* Respectfully disagreeing with the point of view provided during the lecture is a form of a healthy academic dialogue, being consistent with the official KU “Keys to Civility” document. However, this is not the place where you write about your disagreement. This is not a solicitation of your comments or requests either. This problem simply asks you what you have learned. For example, “nothing” as an answer will be deemed as a disagreement, and therefore will given no credit. Something like “everything about geometry” as an answer will be deemed as a ridicule, and will be given no credit. Also, something like “this was the best/worst class ever” as a part of the answer will be deemed as purposely neglecting the aforementioned scope, and will be given no credit. The amount of credit you will receive is proportionate to the accuracy and strength of your understanding of the course content. Avoid reflecting whether or how much you “liked” or “disliked” the subject or the class. Also, simply itemizing some key words is not sufficient. Provide your answer in full sentences. Length-wise, 1/2 page to one page will be considered ideal. Be concise. Attach extra sheet, if necessary.
